

# ECRKE Seed Research Report

Hermetic seed run - all content is fictional research material.

## Contents

1. Summary findings
2. Evidence table

## **1. Summary findings**

Retailers report stronger same-store sales growth as e-commerce expands its share of total retail spending. AI demand forecasting lowers retail inventory carrying costs by improving demand prediction accuracy. Personalized product recommendations boost retail conversion rates without degrading customer trust. The seed run generates this report from two allowlisted sources with a deterministic pipeline.

2. Evidence table

|                        |     |                    |
